Comprehensive Safety Analysis 2010 (CSA 2010), which is designed to improve the efficiency and effectiveness of FMCSA's enforcement and compliance program.

How will this change affect drivers?
- Unsafe carrier and driver behaviors that lead to crashes will be identified and addressed
- All safety-based roadside inspection violations will count, not just Out-of-Service (OOS) violations
- Drivers will be more accountable for safe on-road performance — good news for drivers with strong safety performance records

What can drivers do to prepare for the change?
1) Know and follow safety rules and regulations
   - Check out web-based commercial motor vehicle (CMV) safe driving tips at http://www.fmcsa.dot.gov/about/outreach/education/driverTips/index.htm
2) Become knowledgeable about the new Behavior Analysis and Safety Improvement Categories (BASICs) and how FMCSA will assess safety under CSA 2010
3) Keep copies of inspection reports
4) Learn about employers' safety records
   - Check carrier safety records online at http://ai.fmcsa.dot.gov/default.aspx
   - Subscribe to the RSS feed or email list to stay up-to-date on CSA 2010 news and information

Under CSA 2010, FMCSA will:
- Reach more CMV carriers earlier and more frequently
- Improve efficiency of carrier investigations by focusing on specific unsafe behaviors, identifying causes, and requiring corrective actions
- Hold carriers and drivers accountable for their safety performance, demanding and enforcing safe on-road performance
Q. Why does FMCSA’s new CSA 2010 program emphasize driver safety enforcement?
A. Studies have shown that unsafe driver behavior, both on the part of CMV drivers and other drivers, is a major contributor to CMV-related crashes. Some studies indicate that a small segment of the CMV driver population is involved in a disproportionately large number of crashes. As a result, during the CSA 2010 Operational Model Test, FMCSA is expanding its approach to identifying and addressing unsafe drivers during interventions with motor carriers.

Q. Can you describe the CSA 2010 driver safety enforcement process?
A. The driver safety enforcement process provides FMCSA with the tools to identify CMV drivers with safety performance problems and to verify and address the issues. The new tools enable Safety Investigators (SIs) to identify drivers with poor safety histories who work for carriers that have been identified as requiring a CSA 2010 investigation. If the investigation results verify the driver violation(s), FMCSA takes an enforcement action against that driver, such as a Notice of Violation (NOV) or a Notice of Claim (NOC).

Q. What kinds of driver safety performance data is CSA 2010 looking at?
A. The new program focuses on driver enforcement for serious rule violations, such as:
- Driving while disqualified
- Driving without a valid commercial driver’s license
- Making a false entry on a medical certificate
- Committing numerous Hours-of-Service violations

Q. Do tickets or warnings that drivers receive while operating their personal vehicles impact the new SMS?
A. No. Tickets or warnings that drivers receive while operating their personal cars are state citations and do not count in the new measurement system. SMS only uses violations of FMCSA's regulations, and those regulations only apply to people driving large CMVs. In measuring on-road safety performance SMS uses all safety-based violations documented at roadside inspections, as well as state-reported crashes.

Q. Will CSA 2010 assign safety ratings to individual CMV drivers? I heard that CSA 2010 is designed to rate CMV drivers and to put many of them out of work this summer.
A. No. Under CSA 2010, individual CMV drivers will not be assigned safety ratings or safety fitness determinations. Consistent with the current safety rating regulations (49 CFR part 385), individual drivers will continue to be rated, as they are today, following an on-site investigation at their place of business when they operate independently as a “motor carrier” (i.e. have their own USDOT number, operating authority, and insurance). CSA 2010 is designed to meet one overriding objective: to increase safety on the Nation’s roads. Therefore, it is, by design, a positive program for drivers and carriers with strong safety performance records, and it will send a strong message that drivers and carriers with poor safety performance histories need to improve.

Q. What is the Pre-Employment Screening Program (PSP) and when does it start?
A. PSP is a new FMCSA program mandated by Congress that is designed to assist the motor carrier industry in assessing individual operators’ crash and serious safety violation history as a pre-employment condition. The program is voluntary. It is not part of CSA 2010. The system is expected to launch in early 2010 and enrollment for PSP will be available soon. For more information about PSP, email FMCSA at psp.fmcsa@dot.gov.

Q. What is the detailed process for drivers to contest information contained in their FMCSA driver records?
A. Drivers should use FMCSA’s DataQs system to challenge data in FMCSA databases. To do this, drivers can go to the DataQs registration page at https://dataqs.fmcsa.dot.gov/login.asp, should select “Register Online” as a general public user, and can create a DataQs account profile. Once registered, drivers can challenge their data by following detailed instructions in the help menu. The Agency is in the process of improving the DataQs website to make the process of challenging data more apparent to drivers.
