

Fleet Compliance Services

IFTA Fuel and Mileage Tax Services

IFTA Fuel and mileage tax reporting doesn't have to keep you distracted from all the other aspects of your business. TransCore can help you keep your trucks running legally and efficiently across state and provincial borders. Our services are designed to be fast, user-friendly, and cost effective. You'll never have to worry about keeping up with ever-changing regulations.

Start with the basics. Fuel and mileage tax services

You simply provide us with trip sheets. We audit them for accuracy and enter the data in our system. Or you can provide us the data from your automated GPS tracking system. We process the data and retain it for as long as regulations require. Of course your data isn't just sitting there. We analyze it and create more than a dozen useful reports that give you a clear picture of your fuel and mileage tax liability. You can access imaged trip data via the Internet - anytime, anywhere.

Taxes as Easy as 1-2-3

Increase your productivity with TransCore's line of fuel and mileage tax reporting services. We offer three different options designed to meet the needs of the independent owner operator, small company, or large fleet. Depending on the needs of your company, you can choose from one of the following:

1. **Paper:** You provide the trip sheets in any form you choose; we audit them for accuracy, scan them for easy and historic access, and process the data
2. **Paperless:** We download your data from TransCore Tracking & Communications, QualComm, Cadec, PeopleNet, Xata and other GPS systems
3. **Do it Yourself:** Enter your own data into our Web-based application and generate reports based on that data

From there, our system enables you to easily generate, print, and mail accurate electronic fuel tax reports!

Additionally, our Fuel & Mileage Tax Services online system includes a free fuel optimization and routing module that helps you plan the most efficient route, locating the cheapest diesel on that route, and then track the fuel taxes associated with that route using the most accurate database of highway miles in North America.

IFTA Fuel and Mileage Tax Services

Essential Details - Flexible Functionality

With more than three decades of service to the transportation industry, we understand the importance of providing detailed functionality that is easy to use. You'll find many convenient features that will improve your efficiency and productivity including:

- Simple and accurate tax calculation
- Information analysis by TransCore to find and avert errors before the auditors do
- Routing Services
 - “Flat Interface” – more user-friendly than ever before, letting you email or print any section of the full report page, pan or zoom with ease using Map Controls
 - User-defined Routing – allows you to route your trips your way and choose from Truck Shortest, Truck Practical, or Interstate Preferred routing
 - “Force Trip” – you choose your preferred highways and create your own customized user locations
 - Color Zoom maps – view one million points in North America on a detailed and fully functional map that can be zoomed and panned
 - Mileage from Zip and Postal Codes – Bring the mileage of your trip down to within one block in any major North American city
- 15 standard reports including:
 - Fuel and Mileage Tax Summary
 - Mileage Continuity
 - State Miles/Gallon Summary
 - Individual State/Province Summary
 - MPG/KPL report
 - Equipment List Reports
- Customizable reports to meet your specific needs
- Trip Sheets Management
 - Customers can view the actual scanned/imaged trip sheet
 - Agents can often fix incomplete trip sheets without customer intervention
 - Customers can manage suspends online – fixing incomplete/incorrect trip sheets that agents can't

We treat each truck as if it is our own, managing your tax calculation and reporting while you focus on your core business. Allow TransCore to be your back office partner to ensure your business is compliant and minimize the risk of financial penalties or worse - loss of business.
